* Courses which are expected to attract large numbers of first-year students are strongly encouraged to use a scheduling pattern which meets for more than one day each week.

** Courses which are expected to attract large numbers of first-year students are strongly encouraged to use a MWF scheduling pattern instead of this MW pattern.

For Saturday classes, check with the Curriculum and Scheduling Office for allowed times.

**Special Situations For
CLASS SECTIONS MEETING THREE (3) HOURS PER WEEK**

Times for Fall 2009:

In addition to the regular times listed for “CLASS SECTIONS MEETING THREE (3) HOURS PER WEEK,” the following times are available for graduate/post-baccalaureate (500- and 600-level) courses:

M or W	T or R
1000 - 1245	
1300 - 1545	1300 - 1545
1600 - 1845	1600 - 1845

In addition to the regular times listed for “CLASS SECTIONS MEETING THREE (3) HOURS PER WEEK,” the following times are available for **"paired"** lower-division (100- and 200-level) courses or **"paired"** upper-division (300- and 400-level) courses; pairings should be made so as to encourage students to register to take the two courses together:

M or T or W or R
Course A: 1600 - 1845
Course B: 1900 - 2145

See Example

COMM 360 (01) M 1900 - 2145
COMM 425 (01) M 1600 - 1845

In addition to the times listed above for “CLASS SECTIONS MEETING THREE (3) HOURS PER WEEK,” three-hour laboratory sections (which are coded as such, i.e., C/S codes 15, 16 and 17) and which meet in dedicated laboratory facilities may be scheduled for any two hour and 45 minute period beginning on an hour or half-hour; such laboratory sections may overlap University Hour. In choosing laboratory times, departments are required to consider the impact of these times on students’ ability to build complete class schedules. Note that a lab which meets on a weekday other than Friday (say, Monday) and which selects a time period which is not synchronized with the predominant patterns (say, 930 - 1215) precludes a student from being able to register for courses offered in three common patterns (in this example, MW 830 - 945, MW 1000 - 1115, and MW 1130 - 12:45). On the other hand, shifting the lab time by a half-hour to 1000 - 12:45 would only rule out two MW periods.

**CLASS SECTIONS MEETING FOUR (4) HOURS PER WEEK
